

Homeownership is the foundation for success and a better future. Financial sponsorships are critically important to helping more families find strength, stability and self-reliance. Our partners and donors will tell you that their lives have been enriched by the experience of working along side of a well qualified family to completed their dream of homeownership.

**Full House Sponsor \$70,000 or Half House Sponsor \$37,500** The sponsoring group or groups provide the funds and volunteers to work alongside a future homeowner as they build their home. Typically, the sponsor or sponsors provide 25 volunteers per day over the 9 week build. Our development team can assist you in creative fundraising and can identify and include additional volunteers as needed.

**Team Build Day Sponsor \$10,000** The team build sponsor provides funds and volunteers for 1 day of a build. You provide a group of 20-25 people and we will provide a great team building experience. Team build days can be part of an annual community service project or just as a fun way for co-workers to bond through a team building experience.

**Contributing Sponsor \$2,000 and up** A contributing sponsor joins with other sponsor groups to experience a Habitat build. Opportunities to volunteer are determined by the partnering groups and total available workdays to complete the build.

**Renovation Sponsor \$20,000 to \$40,000** A Major or Minor Renovation sponsor provides the funds and volunteers to complete the renovation of a home for a well-qualified Habitat homeowner. As each renovation is different, the number of days of work and number of volunteers needed varies. Typically, renovations take between 2-6 workdays and require 15 volunteers per day.

**In-Kind Sponsor** In-Kind sponsors provide constructions materials or services toward the building or renovating of a Habitat home. The materials provided have to meet our building standards and approved by the affiliate.
